

The Keck Institute for Space Studies  
presents a short course on:

# What is Exploration Telepresence *and* How Can it Help Us Explore Planetary Surfaces of the Solar System?

---

Monday, October 3, 2016

8:00 A.M. Coffee

8:30 A.M. - 12:30 P.M. Short Course

Beckman Institute Auditorium  
California Institute of Technology

---

**Prof. Kip Hodges - Arizona State University**  
Principles of Geologic Fieldwork on Planets

**Dr. R. Aileen Yingst - Planetary Science Institute**  
Executing Geologic Science with Long Latency  
Robotic Assets

**Dr. Terry Fong - NASA Ames Research Center**  
Human/Robotics Collaborations and Interactions

**Dr. Daniel Lester - Exinetics**  
Lessons Learned via Telepresence Usage on Earth

---

No registration is required for this short course.  
Seating is limited and is available on a first come, first served basis.  
An informal lunch is provided for all attendees.
