The Keck Institute for Space Studies
presents a half-day short course on:

Measurements and Models at the Surface of Mars

**Ray Arvidson - Washington University
Robert C. Anderson - JPL
José Andrade - Caltech
Karl Iagnemma - MIT**

This short course will review the methods for measuring and modeling surface interactions on non-terrestrial environments. The focus will be on soil mechanics and terramechanics techniques for assessing robot mobility over unknown terrains. Engineers, scientists and students are encouraged to attend.

No registration is required.
Seating is limited and is available on a first come, first served basis.
An informal lunch will be provided for all short course attendees.
