The Keck Institute for Space Studies
presents a short course on:

Nano Engineering for Exo Discoveries: Advancing Metasurfaces for Exoplanet Exploration

Monday, September 23, 2024

8:15 A.M. Coffee

8:45 A.M. - 12:30 P.M. Short Course

Hameetman Auditorium

Cahill Building

California Institute of Technology

Noah Rubin - UC San Diego

An Introduction to Metasurfaces

Dimitri Mawet - Caltech

High Contrast Imaging

Jonathan Fan - Stanford University

Metasurface Design

Tobias Wenger - JPL

Metasurface Fabrication

No registration is required for this short course.
Seating is limited and is available on a first come, first served basis.
An informal lunch is provided for all attendees.
