

The Keck Institute for Space Studies presents a short course on:

One Shot to Glory: Designing Adaptive Missions to the Outer Solar System and Beyond

Monday, November 3, 2025 8:15 A.M. Coffee 8:45 A.M. - 12:30 P.M. Short Course

Broad 100 (Rock Room)
Broad Center for the Biological Sciences
California Institute of Technology

Morgan Cable - JPL

Unsolved Mysteries in the Outer Solar System

Alejandro Salado - The University of Arizona

Systems Engineering Challenges for Designing Adaptive One-Shot Missions

Maria Sakovsky - Stanford University

Adaptive Robotics Technologies 1: Hardware

Yisong Yue - Caltech

Adaptive Robotics Technologies 2: Intelligence

Shane Campbell-Staton - Princeton University

Biological Insights into Space Systems Design

No registration is required for this short course.

Seating is limited and is available on a first come, first served basis.

An informal lunch is provided for all attendees.
