The Keck Institute for Space Studies
presents a short course on:

Hybrid Space-Ground Observatories: Revolutionizing the Search for Earth-Like Exoplanets

Monday, March 9, 2026

8:15 A.M. Coffee

8:45 A.M. - 12:30 P.M. Short Course

Chen 100 Lecture Hall
Chen Neuroscience Research Building
California Institute of Technology

John Mather - NASA Goddard Space Flight Center
Hybrid Space-Ground Observatories

Amber Young - NASA Headquarters
Exploring New Worlds:
Exoplanet Discoveries, Challenges, and Future Frontiers

Stuart Shaklan - JPL
Starshades

Ahmed Soliman - JPL
Seeing Clearly - Observing Through Earth's Atmosphere

Markus Kasper - European Southern Observatory
Extremely Large Telescopes - AO and Extreme AO

Eliad Peretz - NASA Goddard Space Flight Center
Orbital Dynamics

No registration is required for this short course.
Seating is limited and is available on a first come, first served basis.
An informal lunch is provided for all attendees.
